

GrabCAD Shop

Work Order Management Software for 3D Printing Model Shops

GrabCAD Shop™ simplifies the 3D printing shop workflow for engineers, designers and shop operators. Reduce time wasted trying to keep track of 3D print requests. Get your prints when you need them.

15% of a typical shop's week is wasted tracking down work order requirements and communicating status between engineers, designers and operators. GrabCAD Shop solves this.

If you're running a shop in these industries, GrabCAD Shop is for you:

Industrial

Automotive

Medical

Aerospace

Education

Architectural

For shop operators:

Stop spending money building custom solutions based on email, spreadsheets, SharePoint and thumb drives. No more keeping track of shop orders on whiteboards and spreadsheets.

For engineers and designers:

Stop struggling with communicating job requirements over email or FTP. No more exporting CAD files to STL.

3D Printing Shop Management Software

Easy and intuitive to use, both for end-customers as well as shop admins and operators.

Simple Work Order Management

Engineers, designers and shop operators save time by sharing a common workspace to simplify print work requests.

Improve Communication & Collaboration

GrabCAD Shop simplifies your 3D printing shop workflow by substantially improving the way your teams manage and collaborate on prototyping work orders.

Eliminate Complex Infrastructure

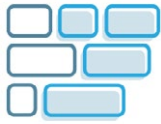

GrabCAD Shop is a web-based application that doesn't require IT assistance or expensive infrastructure. Within minutes, you can personalize your shop with custom branding and available technologies.

The screenshot displays the GrabCAD Shop Management Software interface. On the left, a dark blue sidebar contains a grid of icons and three larger icons representing different shop categories. The main content area is titled 'ACME' and shows the user 'John Smith' with a dropdown arrow. Below this, there are several horizontal bars representing different shop sections. The 'Orders' section is prominently displayed, featuring a search bar, a 'New Order' button, and a table of orders.

Customer	Status	Count
John Smith	In Review	2
Greg Robertson	In Progress	-
Soham Wilson	In Progress	-
Regina Howard	Issues	3
Debra Mccoy	Completed	1
Cameron Webb	Completed	1
Theresa Steward	Completed	1
Morris Henry	Cancelled	5

Built for 3D Printing Shops

Submit, receive and fulfill orders, obstacle-free.

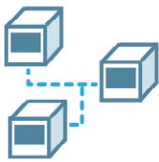

Manage Incoming Orders

GrabCAD Shop makes it easy to manage 3D printing requests by organizing orders in one place. Shop operators can then estimate costs, update status, edit details and fulfill the orders efficiently.

Reduce Time to Print

Shop operators save time working on print orders by accessing print work requests, CAD files, and projects specs all in one place.

Connect All of Your Machines

GrabCAD Shop is pre-populated with Stratasys printers and materials, and provides the ability to add third party printers and traditional fabrication technology.

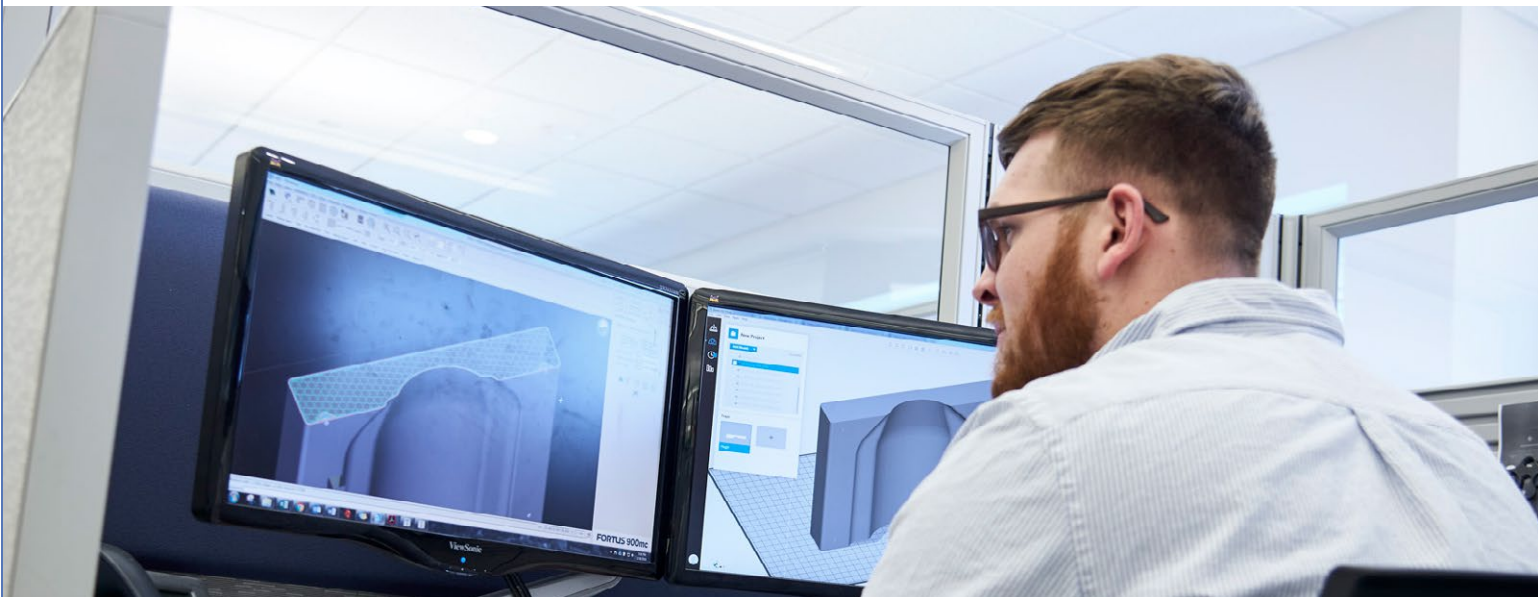

Set Print Job Expectations

Easily communicate your shop's resources, cost estimates and deadlines so your engineers and designers understand how and when their order will be fulfilled. Collaboration and communication features are available directly in the work order.

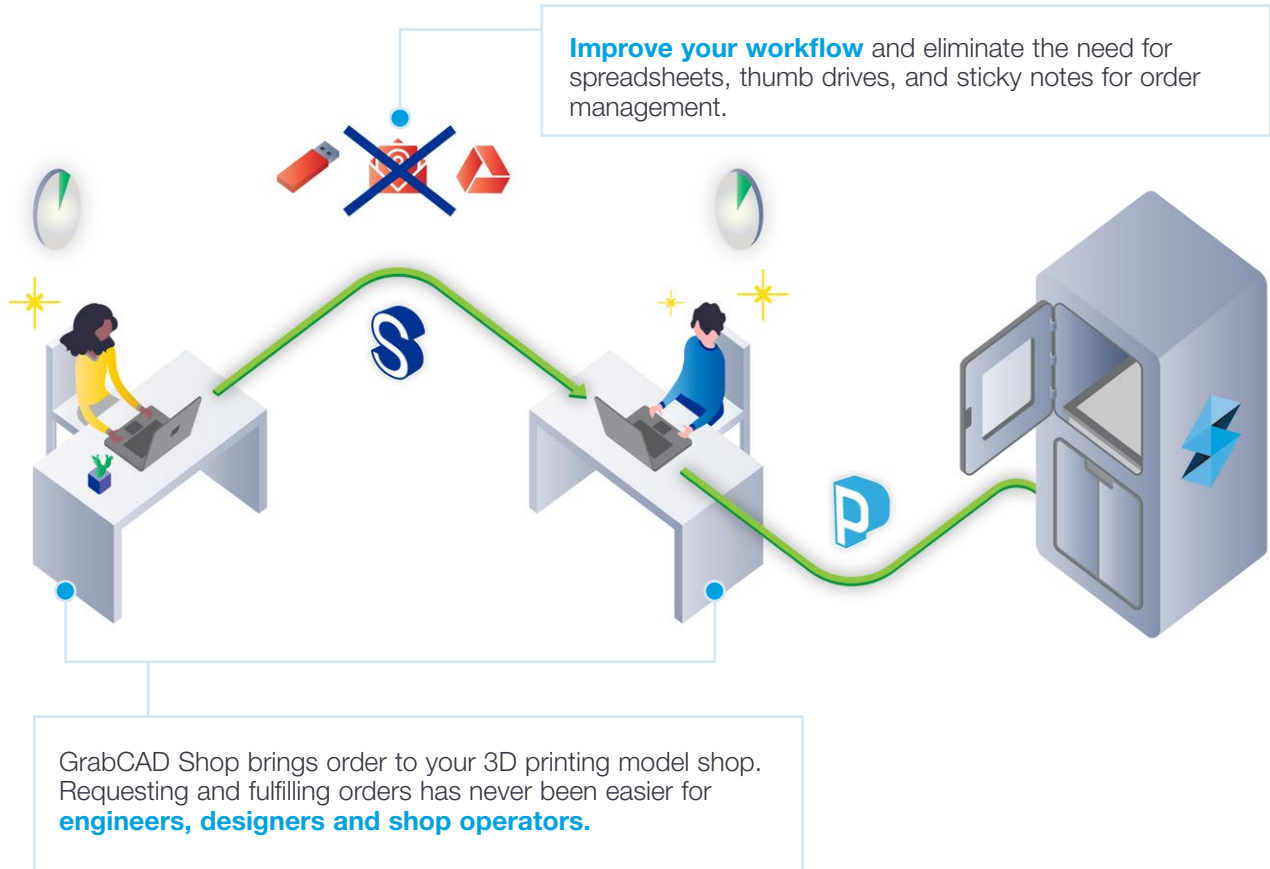

Easy to Use

GrabCAD Shop is web-hosted software so there's no complex installation process. You don't even need IT administrators to download the software. Shop operators can create shops and invite teams to participate in less than 30 minutes.

Seamless Order-to-Print Workflow

GrabCAD Shop improves your workflow, saves time & money, and increases productivity.
