

DLyte 100PRO

The DLyte 100PRO is the largest compact machine for industrial applications. It combines a planetary movement and a vertical backand-forth motion inside the drum containing the electrolyte media. It is suitable to treat materials included in the steel, cobalt-chrome, titanium, copper-based, nickel-based and aluminium groups.

The new DLyte 100PRO's advanced PLC-based electronics allows to apply asymmetric pulses with low and high frequency, and parameter concatenation.

DLyte 100PRO's electrolyte lifespan is linked to metal extraction, as it is able to calculate the remaining media lifespan of the electrolyte taking into account material removal. Thanks to the independent conductivity and temperature probes, it offers readings to the automatic electrolyte conditioning system to optimize performance and its usable life.

The advanced software logs key parameters and warnings of the process, thus assuring traceability of the processed batch. All data can be easily extracted and analyzed through the ethernet and usb ports.

The new hardware is designed with robust and reliable mechanics to work continuously in mass production. It allows to have an easier access for maintenance and operation. Its new safety system includes a warning light tower which indicates the machine status, and antisabotage security system.

Workbowl and holder are not included.

Light tower, anti-vibratory support, conductivity and temperature calibration system are included.

MACHINE SPECIFICATIONS

TECHNICAL DATA (1/2)

Capacity (per cycle)	180 Ø x 80 mm (maximum volume centered to the axis)	
Machine dimensions	950 x 1,320 x 889 mm	
Support dimensions	950 x 786 x 710 mm	
Machine weight	241 kg	
Anti-vibratory support weight	93 kg	
Power (single phase with industrial plug)	5 kW (single phase with industrial plug) 💿	
Voltage	230 V	
Air pressure	4-5 bar (air connector: 8mm or 1/4' BSP')	
	Consumption of 40 l/min. The air quality must be 5:4:4* according to ISO 8573 . (*) Air quality required for a maintenance every 6 months (change of filters).	
Storage capacity (Anti-vibratory support)	231	
Distilled water tank capacity	6.5 l (drain valve included)	
External antisabotage valve	Yes	
Noise level	<70 dB(A)	
HMI size	7"	
Auxiliar 24 V connector inside cabin for holder accessories	Yes	

MACHINE SPECIFICATIONS

TECHNICAL DATA (2/2)	Tower light	,
----------------------	-------------	---

Frequency 50-60 Hz

Index of protection IP20 (polishing module)

Yes

MOVEMENTS Main axial turning

Vertical (up/down)

Holder vibration

Media refrigeration

MACHINE DIMENSIONS

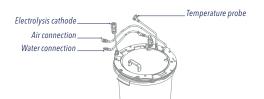

ELECTROLYSIS WORKBOWL

WORKBOWL TYPE Cathode Set Dry Electrolyte

Cathode Set Dry Suspension Electrolyte

WORKBOWL CAPACITY Workbowl volume 16 L

Working volume 180 Ø x 80 mm (maximum volume centered to the axis)

 $180 \ \emptyset \ mm \ x \ 80 \ mm$
